Conversational proficiency

OBJECTIVE:

Passionate and results-driven developer. I excel at creating innovative and effective end-to-end applications, seamlessly integrating front-end and back-end technologies. My exposure to diverse programming concepts has honed my ability to architect and deliver high-quality software products.

WORK EXPERIENCE:

Freelance Work - React

- Student Housing Lancaster February 2024 - May 2025
 - Integrated an interactive map feature, enabling seamless property browsing and improving the overall user experience for students and landlords in Lancaster.
 - Enhancing user engagement and accessibility across devices

- STmedia Company October 2024 - PRESENT
 - Working with Figma to design and build webpages for company clients.
 - Experience working in a startup environment.

Junior Full Stack Developer - React Native/ .Net8/ AWS

- ITPI - Lancaster University October 2023 - August 2024
 - Ensured seamless communication between the front-end and back-end through GraphQL queries and AWS lambda functions.
 - Created a onboarding service in power automate using RESTful api (Microsoft, Devops, Jira) that automated adding new staff members to our ITPI team and assigning appropriate levels of access and permission.
 - Creating controller based API with the ASP.NET to handle user data and worked on creating a new payment portal for Lancaster University.
 - Actively participated in Agile principles and ceremonies, including daily stand-ups, sprint planning, and retrospectives to ensure smooth project execution and continuous development.

Systems Developer Internship - Flutter/ Dart/ Firebase

- The Cyber Foundry January 2023 - June 2023
 - Engaged in weekly communication with a SME, interpreting requirements and feedback in the CI/CD process.
 - Created dynamic and intuitive wireframes to facilitate understanding and proper scope with the client.
 - Independently developed a prototype HR application using the Flutter framework, moving the SME off of spreadsheets.
